Strategic, results-driven Senior UX Designer with 5+ years designing across enterprise SaaS (B2B) and consumer-scale (B2C) products in high-stakes, data-dense environments spanning FinTech, HealthTech, and EdTech. Brings a rare vantage point to product decisions from a foundational background as a licensed dental surgeon (BDS), grounding design work in evidence-based, compliance-aware thinking. Proven track record leading end-to-end design for AI-assisted and agentic workflows — from document intelligence to automated QA — validating outcomes through usage analytics (Pendo, Gainsight) and cutting a core clinical task time by 78% on a legacy B2B healthcare platform used by frontline care teams.

SKILLS

- **Design Expertise:** Application Revamp/Visual Design Lifecycle, Design Thinking, High-Fidelity Prototyping, Information Architecture, Interaction Design, User Experience Design (UED), UX Writing, Wireframing
- **Research & Analytics:** Focus Group Discussions, Human-Computer Interaction (HCI) Principles, Mixed-Method User Research, Requirements Gathering, Usability Testing, User Engagement Analytics (Pendo, Kibana, Gainsight), User Research
- **Design Toolkit & Tools:** Claude/VS Code, Figma, Framer, Gainsight, Jira, Lovable, Miro, Pendo, Sketch

WORK EXPERIENCE

FactSet

Mar 2025 - Jun 2026

Senior UX Designer • Full-time

Designed high-impact workflows for research analysts and junior bankers by improving document retrieval, automating slide and Excel validation, and shaping AI-assisted document intelligence tools.

- Built an AI-powered Document Assistant and Transcript Assistant enabling analysts to summarize documents, surface earnings-call themes and Q&A, and query long transcripts conversationally; monitored adoption via conversation interactions per session and Product Engagement Score (PES).
- Simplified search across Documents, News, and Alerts through improved information architecture, making content easier to find.
- Designed and shipped an automated slide/model check QA workflow in the FactSet Sidebar, reducing manual validation effort by flagging formatting, boundary, and compliance errors before junior bankers filed reports.
- Defined success metrics and validation criteria for an automated slide error. Check workflow ahead of build, aligning engineering and product stakeholders on KPIs for a QA initiative—establishing outcome-first scoping before a single screen was designed.
- Analyze user engagement metrics using Pendo and Kibana to iterate UI/UX designs and reduce drop-off rates.
- Contributed to maintaining 46.8% WAU/MAU stickiness across DocSearch and Document News & Alerts.
- Collaborated with product, engineering, and content teams to turn complex financial requirements into usable designs, providing detailed specs and ensuring accessibility and design system consistency.

ConveGenius.AI

Feb 2024 - Mar 2025

Lead UX Designer

- Created design systems to improve design consistency in product and reduce design iteration time.
- Led user research — interviews with teachers, students, and stakeholders — alongside user flows, journey maps, personas, wireframes, and usability testing.

- Collaborated with developers, designers, Product managers, and other stakeholders on feature design decisions.
- Worked on company-wide AI-based initiatives, which are now being used by 150 million students in India.
- Collaborated with product and growth teams to conduct A/B tests, optimizing onboarding UX and achieving a 66% increase in D15 retention within 3 months.

ResMed India Private Limited

Nov 2022 - Feb 2024

User Experience Designer

- Worked on modernizing key clinical workflows in a legacy healthcare SaaS platform by combining data insights, user interviews, and repeated usability testing. This reduced a core 5-minute workflow to roughly 1 minute, making daily tasks noticeably easier for healthcare teams.
- Designed user-centered solutions across e-MAR, skilled nursing, and EHR modules, creating flows and storyboards that supported smooth, predictable clinical workflows.
- Used analytics (Gainsight) along with qualitative feedback to identify pain points and guide design decisions, focusing on reducing friction and improving productivity for frontline healthcare workers.
- Reduced time spent by healthcare workers through modernizing a 23-year-old legacy healthcare SaaS product with data-driven insights, qualitative user interviews, and repeated usability testing; reduced task time of 5 mins by 78%
- Worked on Data-driven design using data analytic tool (gain-sight).

Onething Design studio

Sep 2022 - Nov 2022

UX Designer

- Part of Royal Enfield mobile booking app and the QUBO Smart Plug digital products design team.
- Handled user research, competitive research, wireframes, high fidelity prototypes across projects.

Mobiux Labs

Apr 2022 - Sep 2022

UX Designer

- Worked as a designer for travel and booking products aimed at US and EU users. prototypes, and developer handoff.
- Collaborated with internal and external stakeholders from product, engineering, and founding teams.
- Led the full design process for a travel itinerary and booking platform, from early research through wireframes,
- Worked closely with product, engineering, and the founding team to shape features and ensure designs matched both user needs and technical constraints.

Freelancer

Jan 2021 - Apr 2022

Product Designer

- Designed workflows and product foundations for multiple healthcare and EdTech products.
 - Conducted market research and developed personas to help teams define MVP requirements and prioritize early features.
- Built design roadmap for new products: Ala Care for Doctors, Phlebo app, Mentorites.
- Created user personas, product market research for both apps with feature priority for MVP.
- Created design roadmaps and key workflows for products such as Ala Care (doctor workflows), the Phlebo app, Mentorites & 11Plus at ease

EDUCATION

Bachelor of Dental Surgery

SVS Institute of Dental Sciences • Telangana • GPA: 67%

Oct 2014 - Oct 2019
